

Enviropak 7600

Enviropak 7600 provides steam performance equal to compressed asbestos and surpassing most non-asbestos sheet materials. Enviropak 7600 also has

- Better resistance to creep than other non-asbestos sheet materials
- Outstanding Sealability
- Stress ratings similar to compressed asbestos fibre—re-design of flanges not generally necessary
- Unique, non-stick finish for easy release from flange faces

Description	A premium quality compressed non-asbestos material comprised of synthetic fibers with a nitrile rubber binder.
Color	one side white and one side yellow.
Finish	An exclusive non-stick surface finish on both sides.
Operating Guidelines	Maximum temperature 800° F Maximum pressure 1,450 psi

Note: *These figures are only a guideline, limits do not necessarily operate together for all gasket thicknesses and conditions.*

Typical Original Properties	Specific Gravity	1.5	
	Compressibility	ASTM F36A — 15%	
	Recovery	ASTM F36A — 50%	
	Stress relaxation	4,350 psi	
	Sealability	0.03ml/min	
Typical Properties	After Fluid Immersion (1.5 mm thickness material)		
	Thickness Increase:		
	ASTM Oil 1	5 hours 300° F	0-5%
	ASTM Oil 3	5 hours 300° F	0-5%
	ASTM Fuel A	5 hours 73° F	0-5%
ASTM Fuel B	5 hours 73° F	0-5%	

Performance Test

No other gasket material has the thermal and mechanical stability of Enviropak 7600. In performance tests using true sealing conditions, Enviropak 7600 barely deforms when competing brands are badly crushed at temperatures as low as 660° F.
